NEW

Long-Lasting & Reliable

For more than 90 years, schools across the country have relied on Bradley products. Bradley handwashing fixtures are designed for long-lasting, vandal-resistant, low-maintenance and water-conserving performance.

Bradley handwashing fixtures save on materials, installation time and water usage – making them a cost-effective choice for your school.

From Washfountains to the new Express® ELX-Series Lavatory Systems to Classroom sinks, Bradley provides the best answer for any school application.

Our handwashing systems are available in a wide array of Terreon® solid surface colors, Evero® natural quartz surface, Terrazzo, or Stainless Steel to complement any design.

EXPRESS® ELX-SERIES LAVATORY SYSTEM

Bradley's new **Express® ELX-Series Lavatory System** is the ideal alternative to china sinks and laminate countertops that is easy to specify, install, clean and maintain. This attractive new lav is designed to handle the heavy demands of school restrooms. Made of durable – and repairable – Terreon® solid surface, the ELX-Series is available in a full line of colors and in 2- or 3-station units.

ACTIVATION ADVANTAGE

TOUCHTIME®

METERING CONTROL

Each low-voltage push button actuates a non-hold-open, slow-closing, anti-hammer solenoid valve that is timed from an electronic potted assembly. TouchTime controls water flow at each station through the use of solid-state, digital circuitry.

INFRARED SENSOR

Bradley's sensor module's infrared transmitting beam creates a wide detection area. A timing turn-off delay results in a smooth, controlled hand-washing operation. The adaptive sensor is not affected by varying color tones or darkness. Also, bright light will not activate the system.

BATTERY INFRARED SENSOR

Each battery-powered sensor uses a zone-focused infrared transmitting beam, creating a large detection area. The sensor is not affected by varying skin tones or darkness. The electronically-activated solenoid valve has few moving parts, providing reliable operation that is unaffected by most chemicals and minerals often present in municipal water supplies.

PUSH BUTTON CONTROL

Each push button activates a non-hold-open air valve with adjustable timing. Bradley's push button control activates one valve, which activates one handwashing station.

The **Express® MG-Series Lavatory System** ensures that groups of students are able to quickly wash their hands between classes and before lunch. They cut down on installation time and costs, require fewer connections and are easy to maintain. One-piece integral Terreon sprayhead offers superior vandal resistance. These units are ADA-compliant for both adults and juveniles.

According to the Centers for Disease Control and Prevention (CDC), washing your hands with soap and water is the best way to prevent infection.

Classic Washfountains, the 1921 original, can accommodate 1 to 8 users. Available in Terreon or TerreonRE solid surface or stainless steel. The stainless steel bowls are made from 60% recycled content. Many Bradley Classics are in service for decades. Some units are 60 years old or more and still in service.

8 China Sinks vs an 8 Person Washfountain

SAVINGS TO YOUR SCHOOL

Installation/materials	\$9,684
Water	80%
Space	20-30%
Energy	Heating 80% less water = \$\$

WF2708

Terreon® Deep Bowl Washfountains encourage handwashing. These washfountains accommodate up to eight users – a feature that conserves water and energy and takes up less space than conventional sinks. Lower-height, foot activation and deep bowls make it easier for kids to use. Meet all juvenile height ADA and TAS requirements.

Multi-Fount® Washfountains provide versatility for restroom designs. They come in Terreon or TerreonRE solid surface. They can accommodate 1 to 4 users and even come in a corner unit. Multi-founts provide the highest level of vandal resistance with all piping securely concealed behind the security panel. Wall-mount and floor-mounted units are ADA-compliant.

“The new Bradley washfountain is much easier to keep clean. I’d like to get washfountains throughout the entire school.”

–Bill Ziolecki, Custodian, Madison Elementary

Bradley's **Frequency® Lavatory System's** striking wave design combines ADA-compliant and standard height handwashing. These patented multi-height fixtures allow children, adults and those with disabilities to access the fixture at the same time. This unit is perfect where grades intersect – younger students will feel comfortable at the lower height station, while the standard height is perfect for older students. Available in 2-station, 3-station models.

Bradley's versatile **OmniDecks®** are perfect for use inside the classroom or lab – keeping students under supervision rather than out in the halls. Completely customizable including faucets, drinking fountains, waste receptacle openings and multiple bowl sizes. The Terreon solid surface outlasts plastic laminate countertops hands down. It cleans with common cleaners, and is easily repairable. An optional four-sided drip ledge around the sink perimeter helps keep water off the floor.

VERGE®

The Verge® Lavatory System is made from Evero®, a blend of natural quartz, granite, exotic and recycled materials, which is more durable than granite and maintenance free. Verge incorporates a beautifully-sculpted elongated basin with hidden drain and no visible seams. In keeping with contemporary design the lavatory system utilizes small proportions, including minimalist trap cover to conceal plumbing below. Perfect for higher education applications.

EVERO® NATURAL QUARTZ SURFACE

Evero™ Natural Quartz Material. Evero is the first and only natural quartz material that can be molded into round and curved shapes giving you not only stunning design options to explore but a high performance product that is as beautiful as it is long lasting. Made from natural materials, such as quartz and granite, plus 25% pre-consumer recycled content and a bio-based resin. The Pearl Series contains 70% natural content.

Advocate

Welcome to the future of handwashing. With the award-winning **Advocate® AV-Series Lavatory System**, everything's within reach for the ultimate in convenience, comfort, and safety. Advocate is a completely touchfree system with soap, water and hand drying all-in-one for a safer, cleaner handwashing experience. Advocate's basins are available in Terreon or TerreonRE solid surface material.

Terreon®

Terreon® solid surface and Terreon®RE recycled solid surface last a lifetime and can easily be repaired and renewed, thus minimizing the need for replacement or disposal. Terreon is a non-porous material which means that it will not support the growth of mold, mildew or bacteria, all substances that can adversely affect indoor air quality. Terreon is certified to meet the highest industry quality and performance standard for solid surface materials, ANSI/ICPA SS-1-2001.

SHOWERS & SHOWER STALLS

The pathway from kindergarten through high school is probably one of the ultimate test tracks in any product's life cycle. Only proven, solid solutions that can withstand the rigors of children, teens and young adults will make the grade. **Bradley shower products** score high on this test. Today's student housing market calls for both durable yet increasingly upscale bath and shower solutions.

- Student housing and shower rooms are increasingly private accommodations
- Showers provide a space and moment for relaxation in an otherwise hurried day: focus on systems and designs that appeal to feelings of "home"
- In public spaces, focus on designs that encourage social interaction, while offering a sense of privacy with respect to personal space

WASHROOM ACCESSORIES

Bradley's stainless steel washroom accessories are made with the industry average 25% post-consumer and 35% pre-consumer content stainless. These products are long lasting and vandal resistant and won't have to be replaced for years to come. Offering the widest assortment and shortest lead times, Bradley's washroom accessories are right for any green project. Diplomat accessories are manufactured with clean energy that has been offset with renewable energy through the WE Energies **Energy for Tomorrow®** program.

TOILET PARTITIONS AND LOCKERS

Bradley's **Mills® Bradmar Partitions** are sturdy enough for the toughest applications, The material won't rust or dent or have to be repainted. Graffiti is easily removed with common cleaners and most scratches can be buffed out. Bradmar solid plastic partitions can also be used to create privacy stations in the shower room as the material won't be affected by humidity. The one inch thick panels keep vandals from causing trouble. Mills Partitions are available in other materials and in a variety of styles. In addition to Bradmar solid plastic, Mills partitions also available in powder coated, phenolic, stainless steel, and Fusion granite with stainless steel pilasters.

Solve metal locker maintenance and repair issues with **Lenox® Bradmar Lockers**. Lenox Lockers will not rust or dent or have to be repainted. Whether in a high-humidity locker room or high-traffic hallway, these lockers stand up to the toughest conditions. **Plus they are backed by an industry leading 20-year warranty.**

Graffiti is easy to remove from Bradmar and it won't rust or dent

WATER TEMPERING SOLUTIONS

Emergency Plumbing Fixtures help prevent serious eye injuries and are essential components in more than science laboratories. Shop areas, maintenance departments, art classrooms and even the kitchens of school cafeterias are safety-critical areas. Bradley's Halo technology provides 85% facial coverage - 20% more than other available products. Our broad product line includes eyewashes, drench showers and portable units.

Another maintenance-saver from Bradley – **Navigator® Thermostatic Mixing Valves**. With single valve design, you just set it and forget it! Installation is a snap and it is so reliable, it is virtually maintenance free. Plus, these valves come with an industry exclusive 10 year warranty on liquid-filled thermostat. Point-of-use models also available.

“The new Bradley TMVs are working marvelously. I’m amazed by the lack of maintenance on these valves.”

– Lou Perleoni, Head of plumbing services,
University of Hartford

Built to the toughest standards, **Keltech® electric tankless water heaters** provide hot water on demand and save water and energy. Boiler systems have to generate and maintain temperature 24 hours, seven days per week. Keltech heaters save energy by heating water only when necessary, and the innovative controller is fully modulating thus only the actual kW needed are used. Keltech tankless heaters also save space, requiring only 3 square feet. Only one electrical connection and water is required for easy installation and there aren't any tanks, anodes or softeners to maintain.

Precise. Reliable. Durable. Tankless.
